

ProTEX Med®

Implantable Grade Polypropylene

ProTEX Med® Overview

- ProTEX Med® is a custom synthesised resin
- Available for medical implant use, subject to product qualification
- Equivalency data available relative to currently implanted PP grades
- Unique FDA Device Master File reference available to support product qualification
- Suitability of resin to long-term clinical implantation supported by VitaMESH surgical mesh data: FDA 510k clearance granted for the use of ProTEX Med® resin to manufacture this product in 2018.
- Testing completed to ISO 10993-5 (cytotoxicity) - available upon request
- Aran Biomedical can also custom synthesise polypropylene resin to match the material used in your existing products

Benefits

1. Streamline your supply chain
(Resin-Fibre-Textiles)

2. Ensure continuity of material supply
for your medical implants

3. Leverage FDA medical device
master file and data

End-to-end Solutions for Implantable Biomaterials

- Product design, development and manufacturing services
- Regulatory consultation and support
- From supply of commercial components to finished packaged devices
